If a Participant establishes that the use of MDK Tokens under these Terms is not legal in his jurisdiction, You should not use the MDK Tokens, not acquire them and should immediately stop using or possessing them if such case arises.

Acquiring cryptographic Tokens for personal possession and exchanging them for other cryptographic Tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of MDK to provide MDK Tokens and the availability of the MDK App in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree certainty that MDK Tokens are not legal in certain jurisdiction, MDK will either:

- 1) cease operations in that jurisdiction, or
- 2) adjust MDK Tokens and the MDK App in a way to comply with the regulation should that be possible and viable.

B) Risks associated with Ethereum

MDK Tokens are based on Ethereum blockchain. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause the MDK Tokens to malfunction or function in an unexpected or unintended manner. Ether, the native unit of account of the Ethereum may itself lose value in ways similar to MDK Tokens, and also other ways.

C) Risk of unfavorable regulatory action in one or more jurisdictions

Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Ethereum network and associated blockchain networks and MDK Tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital Tokens like MDK Tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.

D) Risk of theft and hacking

Hackers or other groups or organizations may attempt to interfere with Your Third-party Wallet, the Website or the availability of MDK Tokens and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks. You hereby agree that MDK shall have no liability for any such loss the Participant incur.

E) Risk of security weaknesses in the Website and/or MDK Tokens source code or any associated software and/or infrastructure

There is a risk that the Website and MDK Tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of MDK Tokens.

F) Risk of weaknesses or exploitable breakthroughs in the field of cryptography

Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum, MDK Tokens, the MDK App, which could result in the theft or loss of MDK Tokens.

G) Risk of mining attacks

As with other decentralized cryptocurrencies, Ethereum blockchain, which is used for the MDK Tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, “selfish-mining” attacks, and race condition attacks. Any successful attacks present a risk to the MDK Tokens, expected proper execution and sequencing of MDK Tokens, and expected proper execution and sequencing of Ethereum contract computations in general. Despite the efforts of MDK and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining Attacks, as described above, may also target other blockchain networks, with which the MDK Tokens interact with and consequently the MDK Tokens may be impacted in that way to the extent, described above.

H) Risk of loss of value

Value of MDK Tokens may fluctuate and their Participants might suffer loss in value of such acquired tokens. There might be different reasons that would cause unfavorable fluctuations of the value of the MDK Tokens.

I) Risk of uninsured losses

MDK Tokens are unlike bank accounts or accounts at some other financial institutions and are entirely uninsured.

J) Risk of malfunction in the Ethereum network or any other blockchain

It is possible that the Ethereum network or any other network, to which the MDK Tokens are interacting with, malfunctions in an unfavorable way, including but not limited to one that result in the loss of MDK Tokens

K) Internet transmission risks

The Participant acknowledge that there are risks associated with using the MDK Tokens including, but not limited to, the failure of hardware, software, and Internet connections. The Participant acknowledge that MDK shall not be responsible for any communication failures, disruptions, errors, distortions or delays You may experience when using the Website and MDK Tokens, howsoever caused.

L) Unanticipated risks

Cryptocurrencies and blockchains are new and untested technology. In addition to the risks set forth here, there are risks that MDK cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

M) Insufficient interest in MDK, the MDK App and MDK Tokens

It is possible that MDK, MDK Tokens or MDK App will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of the MDK App.

N) MDK Tokens and the MDK App, as developed, may not meet the Participant's expectations

The MDK App is currently under development and may undergo significant changes before release. The Participant's expectations regarding the form and functionality of the MDK App and MDK Tokens may not be met upon release of new Website, deployment of the MDK App, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of MDK Tokens.
